

## Number of U.S. Species Listings Per Calendar Year (as of December 31, 2000)

<u>Year</u>	<u># Listed</u>
Pre-1973	119
1973	7
1974	0
1975	8
1976	40
1977	20
1978	37
1979	37
1980	16
1981	4
1982	11
1983	7
1984	31
1985	60
1986	36
1987	62
1988	47
1989	32
1990	39
1991	77
1992	80
1993	69
1994	126
1995	18
1996	92
1997	79
1998	64
1999	38
<u>2000</u>	<u>41</u>
<b><i>Subtotal</i></b>	<b><i>1297</i></b>
<u>- delisted species</u>	<u>-28</u>
Total U.S. Listing actions*	1269
<u>- 9 dual status listings &amp; 16 DPS/ESU</u>	<u>-25</u>
<b><i>Total number of listed U.S. species</i></b>	<b><i>1244</i></b>

***\*Explanation:***

Includes species listings by U.S. Fish and Wildlife Service and National Marine Fisheries Service, excludes listings of experimental populations or similarity of appearance.

There have been 1,297 U.S. species listing actions since 1967, but 28 species of these have subsequently been removed from the list due to recovery, extinction, or other factors. In addition, nine species (gray wolf, piping plover, roseate tern, green sea turtle, olive ridley turtle, Stellar sea lion, chinook salmon, sockeye salmon, and steelhead) have dual status, which means that they are listed as Endangered in one part of their range and Threatened in another. Sixteen Distinct Population Segments now tallied as one include coho salmon, chinook salmon, sockeye salmon, and steelhead. Therefore, the number of U.S. listed species, as of December 31, 2000, is 1,244.
